EZ ROLLER

MULTI PURPOSE SECURITY CAGE

High-Security Cargo Solutions | Japanese Quality Standards

The EZ Roller is a fully lockable security cage designed for high-efficiency logistics and secure storage. This container provides a noiseless, smooth, and reliable transport experience for high-value or sensitive cargo.

Standard Configuration

With Optional Shelves

Model	Outer Dimensions	Capacity
EZR M40SC	(L)850mm × (W)650mm × (H)1700mm	500kg
EZR M70SC	(L)1100mm × (W)800mm × (H)1700mm	500kg

Key Features

- Maximum Security: A fully lockable wire-mesh design ensures your goods remain protected during transit or storage.
- Superior Maneuverability: Equipped with a reinforced, lightweight plastic base and high-durability rubber wheels for effortless, silent movement.
- Space-Efficient Storage: The fully nestable design allows units to be tucked into one another when not in use, maximizing floor space.
- Industrial Durability: Features a high-quality powder-coated finish for increased resistance to wear, tear, and corrosion.
- Customizable Organization: Supports up to three optional shelves to organize smaller items or create tiered storage
